

European Colorectal Congress 2022 Scientific Programme

Appendiceal neoplasia - when to opt for a minimal approach, when and how to go for a maximal treatment

Advanced risk stratification in colorectal cancer – choosing wisely surgery and adjuvant therapy

Beyond TME – technique and results of pelvic exenteration and sacrectomy

Cytoreductive surgery and intraperitoneal chemotherapy - is it a revival or a funeral?

Predictors for Postoperative Complications and Mortality

Management of intestinal neuroendocrine neoplasia

Reoperative pelvic floor surgery – dealing with perineal hernia, reoperations, and complex reconstructions

Incidental cancer in polyp - completion surgery or endoscopy treatment alone?

Less is more - pushing the boundaries of full-thickness rectal resection

Salvage strategies for rectal neoplasia

Segmental colectomy versus extended colectomy for complex cancer

Anastomotic Leak

Predictive and diagnostic markers of anastomotic leak

Of microbes and men - the unspoken story of anastomotic leakage

It is leaking! Approaches to salvaging an anastomosis

Debate

Outcomes of modern induction therapies and Wait and Watch strategies, Hope or Hype

Round Table

The unsolved issue of TME: open, robotic, transanal, or laparoscopic - shining light on evidence and practice

ECCO Session

Operative techniques to reduce anastomotic recurrence in Crohn's disease

Innovative approaches in the treatment of complex Crohn Diseases perianal fistula

To divert or not to divert in Crohn surgery – technical aspects and patient factors

EAES Lecture: Use of ICG in colorectal surgery: beyond bowel perfusion

Lars Pahlman lecture

Trends in colorectal oncology and clinical insights for the near future
